**Supporting our
community during
the Corona Virus**

We are contacting you today to let you know that we are putting into place a support network in our village during the Corona Virus outbreak while the restrictions of movement and activity are in place.

We want to make sure that the more vulnerable people in our village are supported. People are already offering through our various activity groups to help and we thank you for these offers.

We have decided to use the Hopewell contact systems as these are already in place. Our contact information is on the front of this flyer.

If you would like to be added to the group of people who are wanting to help please email us on the address overleaf. We would try to link you with people nearby.

If you need support use any of the contact methods on this flyer. We would like to make sure that everyone who needs it gets regular contact especially if they are self isolating at home, ensuring that they are supported in a variety of ways including shopping, dog walking or even horse care.

It may be that you just need a phone call for a chat on a regular basis.

The Hopewell Team
